

Coding is practice... Practice your HTML Code, with help of following steps, which will give you a clear understanding about HTML Media.

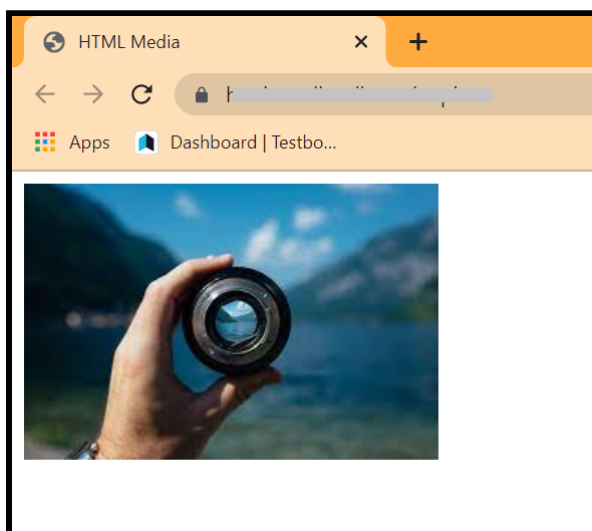

Challenge 1: Including image

Steps:

- Open VS code.
- Select New File in the opened folder...
- Save the file in the appropriate folder/ create the folder and save the file with extension.
- The file in the VS Code appears with file extension after saving.
- Download the image you want, upload it in the same folder of the file.
- Copy and Add the below given html code in the file.

```
<!DOCTYPE html>
<html>
  <head>
    <title>HTML Media</title>
  </head>
  <body>
    <!--Include your image path-->
    </img>
  </body>
</html>
```

- View the file in the browser, by right click on the file name in the left pane.
- View of file in browser.

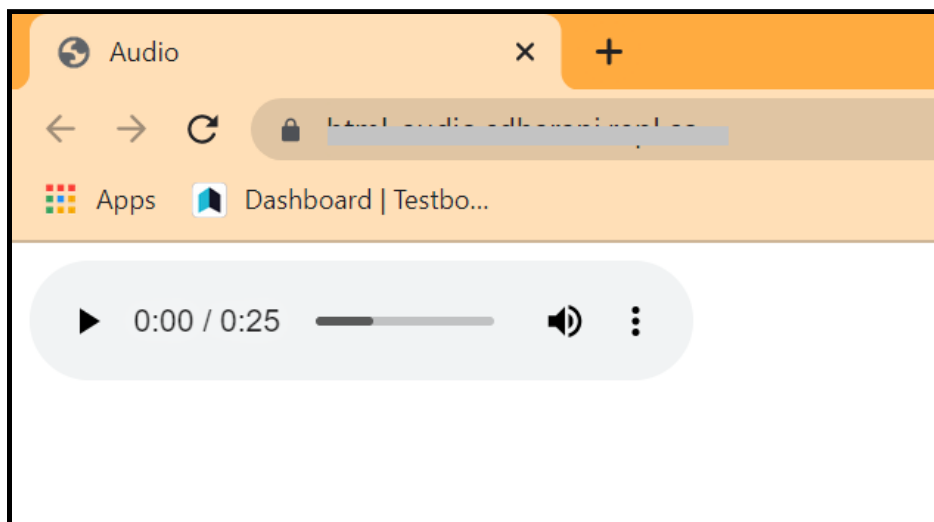

Challenge 2: Including audio files

Steps:

- Open VS code.
- Select New File in the opened folder...
- Save the file in the appropriate folder/ create the folder and save the file with extension.
- The file in the VS Code appears with file extension after saving.
- Download and upload any audio files in the same folder of the html file.
- Copy and Add the below given html code in the file.

```
<!DOCTYPE html>
<html>
  <head>
    <title>Audio</title>
  </head>
  <body>
    <audio controls autoplay>
      <!-- You can add any audio/sound that is supported by HTML, provided media
      should be uploaded in the same folder of the file-->
      <source src="alligator.mp3" type="audio/ogg">
      Your browser does not support the audio element.
    </audio>
  </body>
</html>
```

- View the file in the browser, by right click on the file name in the left pane.
- View of file in browser.

Challenge 3:

With your new gained knowledge on HTML Media prepare a self introduction for yourself,

- Include your photograph in an HTML document as an image.
- Say about yourself in words using <p> tag.
- Say about yourself using audio/video tags.
- Include any HTML tutorial youtube video links.
