

## HTML Media

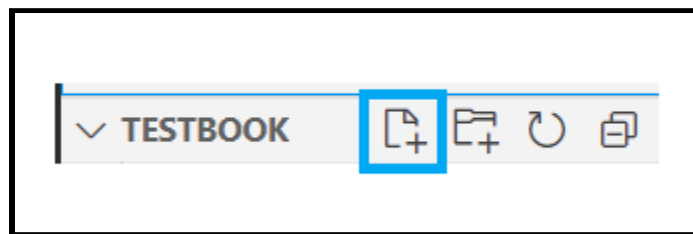

### Problem statement:

With your new gained knowledge on HTML Media prepare a self introduction for yourself,

- Include your photograph in an HTML document as an image.
- Say about yourself in words using <p> tag.
- Say about yourself using audio/video tags.
- Include any HTML tutorial youtube video links.

### Steps:

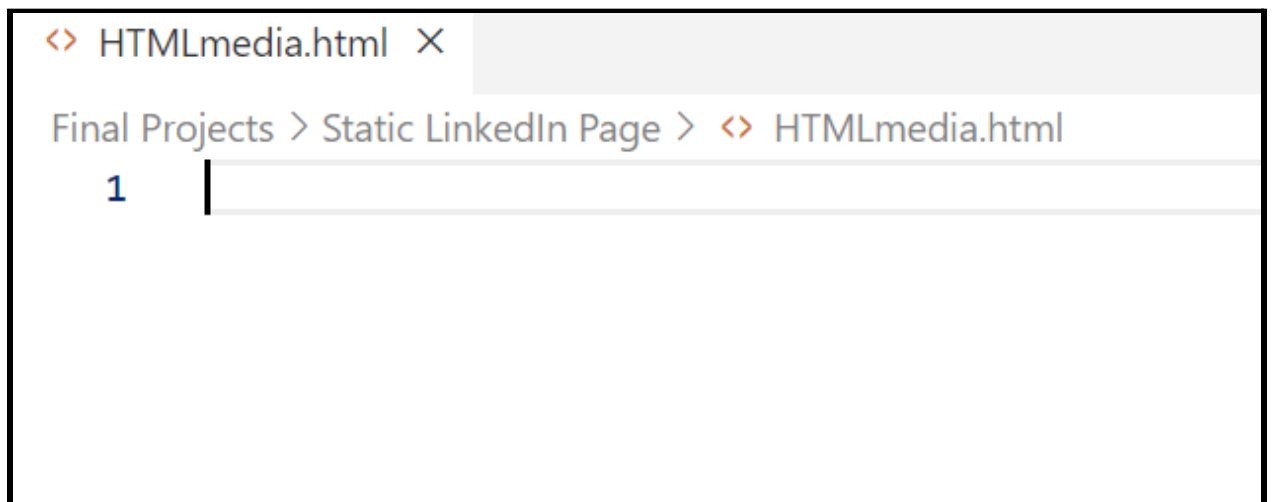

- Open VS code.
- Select New File in the opened folder...

- Save the file in the appropriate folder/ create the folder and save the file with extension.

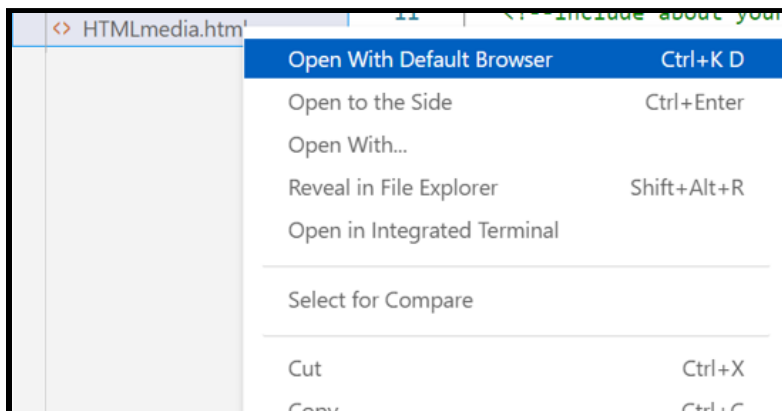

- The file in the VS Code appears with file extension after saving

### Sample code:

```
<!DOCTYPE html>
<html>
  <head>
    <title>HTML Media</title>
  </head>
  <body>
    <!--include about your image link after uploading the image-->
    </img>
    <!--include about yourself-->
    <p>My name is "", about yourself</p>
    <!--include about your audio link after uploading the audio-->
    <audio controls autoplay>
      <source src="myvoice.mp3" type="audio/ogg">
      Your browser does not support the audio element.
    </audio>
    <br>
    <!--copy and paste the embedded youtube link of the video-->
    <iframe width="560" height="315"
src="https://www.youtube.com/embed/LGehGKhJXSU" title="YouTube video
player" frameborder="0" allow="accelerometer; autoplay; clipboard-write;
encrypted-media; gyroscope; picture-in-picture"
allowfullscreen></iframe>
  </body>
</html>
```

- View the file in the browser, by right click on the file name in the left pane.

## Sample Output:
